FEEDBACK COLLECTED AND ACTION TAKEN(2023-24)

The institution actively gathers feedback on various curricular aspects from its students, alumni, and faculty members. For student feedback, the Internal Quality Assurance Cell (IQAC) has devised a structured feedback form encompassing parameters such as curriculum, teaching methods, learning and evaluation processes, syllabus coverage, communication skills, and infrastructure. At the conclusion of each academic session, department heads are tasked with obtaining feedback forms from students. Several students provided constructive suggestions, including enhancing the availability of indoor recreational activities, improving the library's digital resources, and focusing on modernizing classroom infrastructure to further enrich the learning environment.

Teachers recommend organizing more extension activities and increasing the library's book collection.

Alumni now employed in various industries or pursuing higher studies, offer feedback on how their time at the institution influenced their personal development and performance in the workplace or academic settings. The members of the association also gave their constructive feedback. To increase the student's enrollment, they suggested exploring new scholarship and donation avenues so that more needy students were able to enroll for various courses. Many members said that sports should be given more attention in the future. Some said that automation and use of technology in administrative activities should be strengthened. On their part, they expressed their whole hearted support.

Based on the feedback received from students, teachers and alumni, the college has chalked out a plan to augment the library and its services. The deployment of **Mycampus** is a big step in bringing efficiency, openness and technology in the academic tasks related with the staff and the students. A **sports academy** has also been established to promote sports activities.
